SUMMARY

Computer Science Engineering (AI & ML) student proficient in Python, Data Structures & Algorithms, and Machine Learning. Hands-on experience building and deploying projects using Flask, NLP, and Python automation – including a live ML web application on Render. Passionate about solving real-world problems through code. Open to Software Engineering or AI/ML internship and full-time opportunities.

EDUCATION

KIET Group of Institutions – Delhi-NCR, Ghaziabad, India B.Tech in Computer Science Engineering (AI & ML) CGPA: 8.05/10.0	2023 – 2027
Senior Secondary (Class 12) – CBSE Percentage: 86.4%	2022
Secondary (Class 10) – CBSE Percentage: 81.8%	2020

TECHNICAL SKILLS

Languages: Python, C++, C

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Flask, NLTK, SpeechRecognition, Tkinter

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Machine Learning: Random Forest, Data Preprocessing, Model Training, Model Evaluation, Classification

Database: SQL (Joins, Queries) | **Web:** HTML, CSS

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Kaggle, Render, LeetCode, GeeksforGeeks

PROJECTS

Mental Health Prediction and Support System  *Live Demo*
Python, Flask, Scikit-learn, Random Forest, HTML, CSS *Feb – Mar 2026*

- Developed and deployed a Mental Health Prediction System using Flask on Render to assess student depression risk.
- Utilized a real-world dataset of **140,500+ student records** sourced from Kaggle, consisting of **13 features** such as academic pressure, sleep patterns, financial stress, and dietary habits.
- Achieved **84% model accuracy** with data preprocessing, label encoding, confusion matrix, and classification report.
- Integrated a chatbot, personalized recommendations, and rule-based validation for real-world usability.

Voice Assistant with NLP Support  *GitHub*
Python, SpeechRecognition, NLTK, NLP, pyttsx3 *Sep – Oct 2025*

- Developed a voice-controlled personal assistant using Python for web navigation, music playback, smart search, and real-time command execution.
- Implemented NLP-based intent recognition using NLTK for better understanding of natural language commands instead of fixed keyword matching.
- Integrated speech-to-text conversion, voice response, Google search, and Wikipedia summary features.

Multi-Timer Desktop Application  *GitHub*
Python, Tkinter *Nov – Dec 2024*

- Built a GUI-based desktop application to manage multiple independent timers simultaneously.
- Implemented start, pause, and reset functionalities with real-time countdown display.
- Designed clean and structured layout for intuitive user experience.

CERTIFICATIONS

- | | |
|--|----------|
| • AWS Certified AI Practitioner  – Amazon Web Services | Dec 2025 |
| • Machine Learning Certificate  – Oracle Academy | Oct 2025 |
| • Cybersecurity Foundation  – Palo Alto Networks | May 2025 |

ACHIEVEMENTS & ACTIVITIES

- Solved **400+** Data Structures & Algorithms problems across LeetCode and GeeksforGeeks.
- Achieved a maximum coding streak of **132 days** on LeetCode.
- Volunteer at **EkPrayas**, contributing to community initiatives and team-based activities.
